D-51

Index to Volume Fifteen of The Paper Industry

April, 1933—March, 1934

Page numbers in this index are preceded by numbers of the issues. April, 1933, is No. 1 and March, 1934, is No. 12

A

Abrams, Allen, addresses forestry meeting banquet 2, 88
A Century of Progress beckons you 4, 201
Acid action of on rag paper 10, 591
formation in sulphite digestion 9, 529
liquors, concentration of after parchmentizing paper 12, 735
Acidulous oil and its cause 6, 329
Adams, F. W., Rate of drying newsprint 12, 711
Adams, Geo. J., Nip hazards in finishing rooms. 7, 392
Addoms, Charles, Merchants viewpoint on standardization 12, 707
Air penetrability of paper 6, 338
Alfriend, J. V.,
and R. R. Baker, Light sensitive control in the paper industry 3, 140
Alkali pulping process, influence of chemical concentration in 3, 147
recovery and soda furnaces 9, 530
Alkaline process for obtaining high yields of pulp from aspen wood 7, 382
Alkaline wood pulp processes, chemistry of 7, 385
Ammonium alginate in making paperboard 2, 101
Analysis of alkaline black liquors of varying sulphidity by the ammonia distillation method 7, 388
Analyzation of coated papers 6, 316
Annual report offers opportunities to engineers. 10, 583
Anti-friction bearings 4, 200
Application of elementary statistical methods in the testing of pulp and paper 7, 387
Armature repairs 7, 390
Association Meetings:
Affiliated groups meet and elect officers ... 12, 717
American Paper and Pulp Ass'n holds annual meeting 12, 715
Annual meeting and luncheon of Salesmen's Association 12, 718
Canadian Technical Section 11, 640
Luncheon meeting of machinery and equipment manufacturers 12, 719
Oil chemists discuss paper 8, 454
Southeastern supers meet at Asheville 3, 140
Superintendents meet at Green Bay 3, 144
T.A.P.P.I. fall meeting at Appleton 7, 382
Technical Association convenes for 1934 convention 12, 706
Twenty-second annual safety congress 7, 389
Wisconsin valley safety conference 4, 205
A suggested plan 1, 17
Annular shaped pulpstone 2, 103
Aspen wood, high yields of pulp from by alkaline process 7, 382
Automatic temperature control of paper machine dryers 1, 29
Auxiliary drive for cylinder machine 12, 711

B

Baird, P. K., Paper machine variables 3, 147
Use requirements of paper 12, 706
and W. A. Chilson, Forest Products Laboratory research on paper machine variables 7, 385
and R. H. Doughty, Some factors affecting interweb adherence of single plies used in laminated sheets 7, 386
and F. A. Simmonds, Processing variables in evaluating pulps by the pebble and rubber-covered ball methods 12, 711
C. E. Hrubesky and P. S. Billington, Comparative service ability and processing effects of oval cast iron and circular rods in the rod mill 7, 385
C. O. Seborg and R. H. Doughty, Effect of relative humidity on the moisture content and bursting strength of container board 7, 385
F. A. Simmons and W. A. Chilson, The influence of stock temperature and hydrogen-ion concentration on the sheet properties of kraft paper sized with a special starch sizing 7, 385
Baker, C. M., White water problems 3, 146
Baker, R. R. (See J. V. Alfriend)
Banta, H. D., Nip hazards in tissue converting plants 7, 393
Beach, William E., Pressure-Temperature trend in industrial power plants 10, 572
Beadle, Warren E., Jr., Maintenance departments hazards 4, 205
Bearings, anti-friction 4, 200
Beater and jordan control 12, 713
Beater-disintegrator 2, 102
Bed plate geometry 2, 80
Belcher, V. A., Zinc pigments in today's paper industry 12, 713
Berger, O. L., Heat utilization in pulp cooking by the sulphite process 12, 711
Bialkowsky, H. W., A contribution to the knowledge of rosin sizing 7, 383
Bidwell, G. Lamont, Jr., Beater and jordan control 12, 713
Billington, P. S. (See P. K. Baird)
Birchard, W. H., The use of latex in coated papers 10, 561
Bissell, E. S., A new color comparator 7, 388
Optical characteristics of paper 7, 372
Blaisdell, Charles A.
and Jessie E. Minor, The determination of the wool content of paper 11, 625
and Jessie E. Minor, Notes on the purity and permanence of wood fibers 9, 512
Bleached sulphite pulp; improving quality and manufacturing processes 3, 148
Bleaching of paper, continuous 3, 163
pulp, with introduction of elemental chlorine 3, 148
wood pulp 9, 531
Boilers, kraft waste heat 2, 75; 3, 147
Bowman, F. D., Abrasives and abrasive products 3, 148
Boyer, C. K., Managed safety in maintenance and repairs 7, 394
Bragg, A. O., Roofing felt raw materials and quality control 12, 699
Brainerd, F. W., and Otto Kress, A study of wood pulp fractionation 12, 713
Bray, M. W.
and C. E. Curran, Influence of chemical concentration in the alkali pulping process. 3, 147
and C. E. Curran, Method for analysis of soda and sulphate spent liquors by distillation with ammonium chloride 7, 388
J. S. Martin and C. E. Curran, Chemistry of the alkaline wood pulp process—Is there a critical temperature for the sulphate process 7, 385
Brendel, L. S.
and A. H. Stanton, Automatic temperature control of paper machine dryers 1, 29
Brennan, W. J., New Lessons from old causes of injury 7, 393
Browning, B. L.
and H. F. Lewis, A critical study of methods of the determination of alpha cellulose 7, 383
Briggs, L. J., Development and use of quality standards 12, 706
Buettell, M. A., Power transmission layouts ... 8, 443
Bullock, Warren B., Function of Import Committee 12, 707
Bunde, L. F., Kraft waste heat boilers:
Part I 2, 75
Part II 3, 147
Business needs more strict adherence to the golden rule 12, 695
Buyer of printing looks at your paper, the 4, 208

C

Calcium sulphate free from alkali 12, 739
Capillary rise of water in fibrous sheets and possible applications 7, 386
Care of commutators 7, 390
Careless use of tools invites criticism 11, 648
Causes of priming 9, 519
Cellular type filters 8, 470
Cellulose fibers, structure of 3, 162
Cellulose, lignin and papermaking studies:
Part I 9, 509
Part II 10, 568
Centrifugal screening machine 1, 45
Chain grates, operating instructions for 6, 329
Chamberlin, D. S.
Miss R. M. Cobb and B. A. Dombrow, Emulsified paraffin wax size 7, 387
Changes in fiber structure during cooking and bleaching 12, 712
Changes in wood in sulphite digestion 6, 333
Characteristics and power requirements of paper machines, the 8, 439
Charging spherical digesters 3, 163
Chemical mechanism of sulphite process 8, 469
Chemical properties of screen fractions of black gum and slash pine groundwood pulps 7, 386
Chemistry of the alkaline wood pulp processes, is there a critical temperature for the sulphate process? 7, 385
Chemists of Japan make contribution to papermaking research 1, 20
Chidester, G. H.
and C. E. Hrubesky, Penetration of western hemlock chips by calcium bisulphate liquor 7, 384
and J. N. McGovern, Effect of chip length in sulphite pulping 12, 712
